

AI Tools & API Usage

Throughout the program, you'll use industry-standard AI tools and APIs to build, test, and deploy applications.

Estimated Cost: ₹14,000–₹25,000 over the 30-week program (approximately ₹2,000–₹3,500 per month)

This estimate includes expenses such as:

- LLM API usage (OpenAI, Anthropic, etc.)
- Claude Pro subscription (where applicable)
- Short-term software subscriptions and developer tools

Actual costs may vary based on your project requirements and usage.

Cloud Infrastructure (AWS)

Your AWS Cloud costs will vary based on how extensively you use GPU resources throughout the program.

Medium Usage (regular experimentation and model training; ~15 GPU hours/week)

Estimated Cost: ₹16,000–₹24,000 over the 30-week program

Intensive Usage (frequent experimentation and multiple model training runs; ~40 GPU hours/week)

Estimated Cost: ₹25,000–₹34,000 over the 30-week program

Actual cloud costs may vary depending on your usage patterns and the AWS services utilized.
